

Water Mist Fan

Features:

- 1) Centrifugal design, no need nozzle and water filter device, atomization size can be adjusted, low noise.
- 2) Spray and air supply by the independent motor driven, easy to use, easy maintenance, the surface with powder coating, anti-rust performance well, durable.
- 3) 90° shaking head adjustment, third gear speed, waterproof electrical design, safe&security, adopt CAD optimization design, nice appearance.
- 4) Motor with low temperature rise design, stable performance, long run time, high overload capacity, water pump with a protective device , can prevent the water pump burned when water tank is empty.
